

FULL STACK WEB DEVELOPER

I am Full Stack Web Developer specializing in front-end development with a strong knowledge of Ruby on Rails, JavaScript, and React.js. I have a strong appreciation for back-end development and I am currently expanding my knowledge in PostgreSQL and MongoDB. Recently I transitioned from a background in sales and customer service with strong experience in collaborating in teams. I am eager to land an opportunity with a coactive team aimed at technological implementation and innovation.

TECHNICAL SKILLS

Front End – HTML5, CSS3, JQuery, Bootstrap, Materialize
